

next couple of years because we have got all of these programs and all of these proposals that we have just got to go with. Just try running it maybe one year in here like a business. Operate within a fixed budget and cut the fat where there is excess fat and at 11% it will work out fine. You see if you go on this theory that you build up a big pile, you can charge and spend it is kind of like putting ice cream and cake on a kids plate. If you give him X amount in a little bowl he will eat the whole bowl, or if you make a big bowl he is going to eat the whole bowl.

(end belt #6)
